```java
import java.util.Scanner;
class Student{
        static Scanner sc = new Scanner(System.in);
        int roll, marks;
        String name;
        void getData(){
                System.out.print("Enter name: ");
                name = sc.nextLine();
                System.out.print("Enter Roll no.: ");
                roll = sc.nextInt();
                System.out.print("Enter Sem 2 Marks: ");
                marks = sc.nextInt();
                System.out.println("\n");
        }
        void display(){
                System.out.println("----Details----");
                System.out.println("Name: " + name);
                System.out.println("Roll no.: " + roll);
                System.out.println("Sem 2 Marks: " + marks);
        }}
class Main {
  public static void main(String[] args) {
        Student s = new Student();
        s.getData();
        s.display();
        }
}
```

Output:
Enter name: test
Enter Roll no.: 99
Enter Sem 2 Marks: 600

----Details----
Name: test
Roll no.: 99
Sem 2 Marks: 600
